Engineering Implementing Supporting

Luxury Smart Homes
Throughout the Hamptons

Engineered Solutions For Any Project

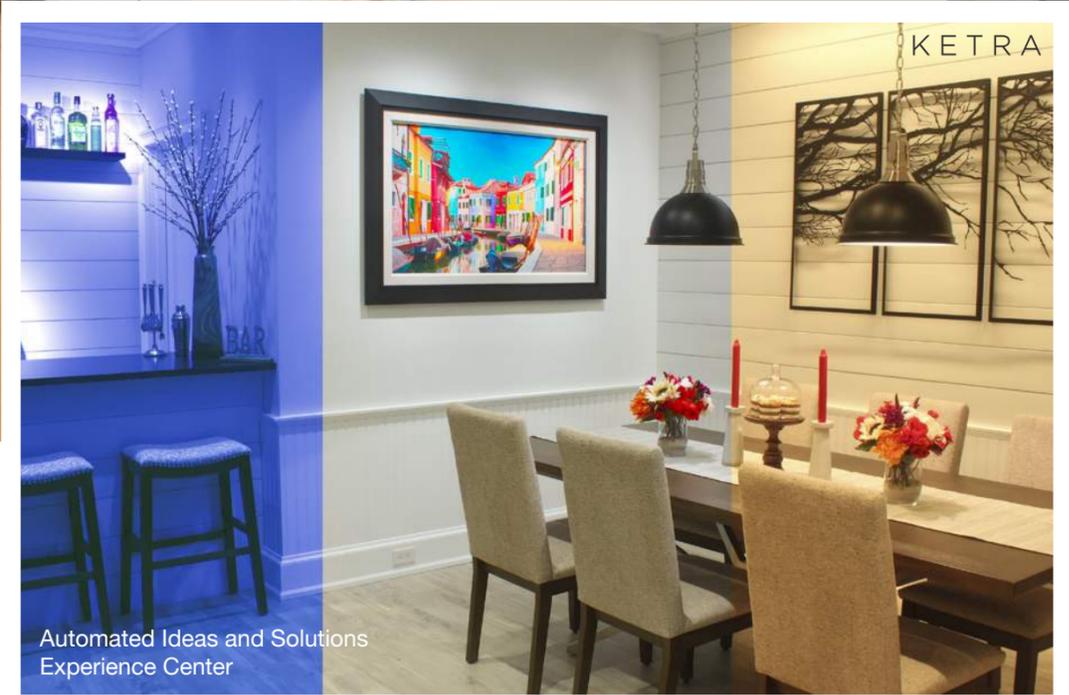

Automated Ideas and Solutions engineers, implements, and services some of the worlds most well-appointed luxury smart homes. From initial consultation through client occupancy and beyond, our expertise in design, engineering, project management, construction, and service brings knowledge and value to every project.

Empower Any Mood

Automated Ideas and Solutions
Experience Center

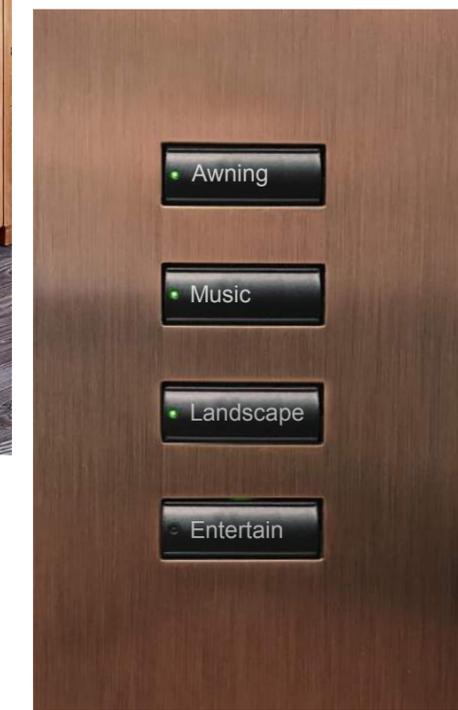

Integrate natural and artificial light, climate, music, and more to create the perfect scene for any mood. Add the power of Ketra® lighting and Lutron® controls to create dynamic environments with the ability to instantly redefine how spaces look and feel. Automated Ideas and Solutions is among Lutron's exclusive group of Diamond Elite Level providers, offering the most comprehensive service and access to their entire line of products.

Endless Options

Brushed and burnished metals, polished glass, and custom colored finishes allow you to design freely. You're able to focus on style and feel, knowing that accessories such as shades, controls, and thermostats will only add to the aesthetic, never detract. Choose from Lutron's extensive line of colors, textures, and finishes, including their latest Palladiom® offerings, or pick something with a more traditional look.

Embrace Entertainment

Create the perfect gathering place and blur the line between inside and outside by harnessing our expansive array of products, including outdoor lighting, music, video, awnings, insect screens, and more. Whether you choose to complement, coordinate, or blend with landscaping and hardscaping, you'll have access to thousands of size, style, color, feature, and budget options.
